# Waze

# VS

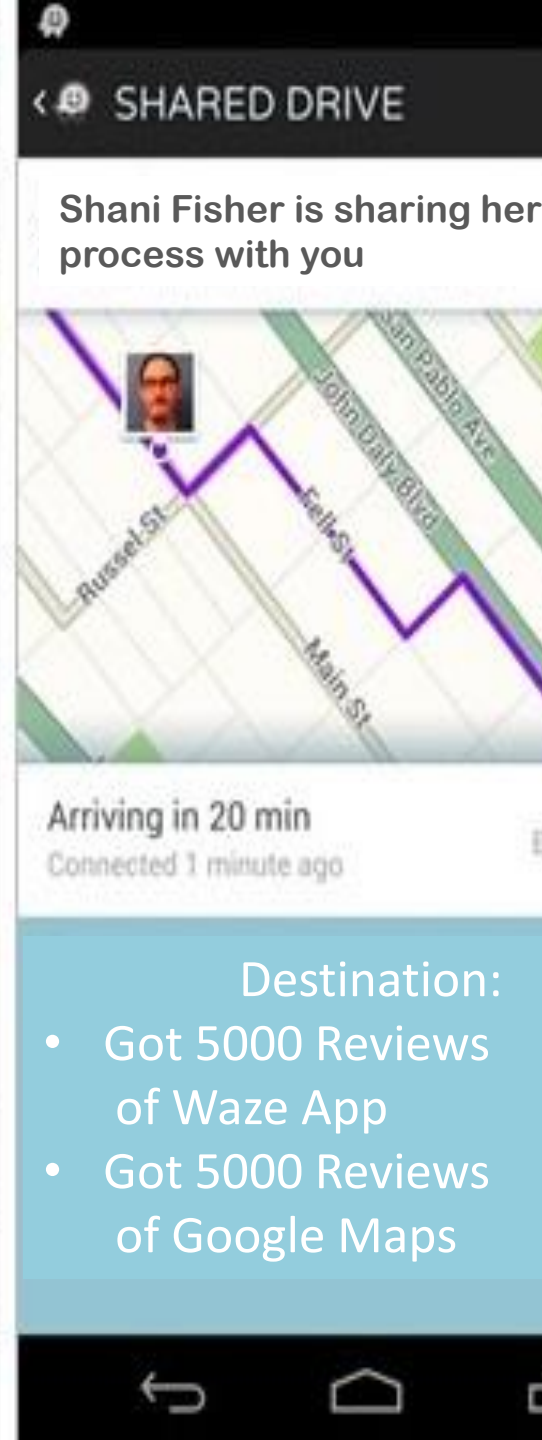

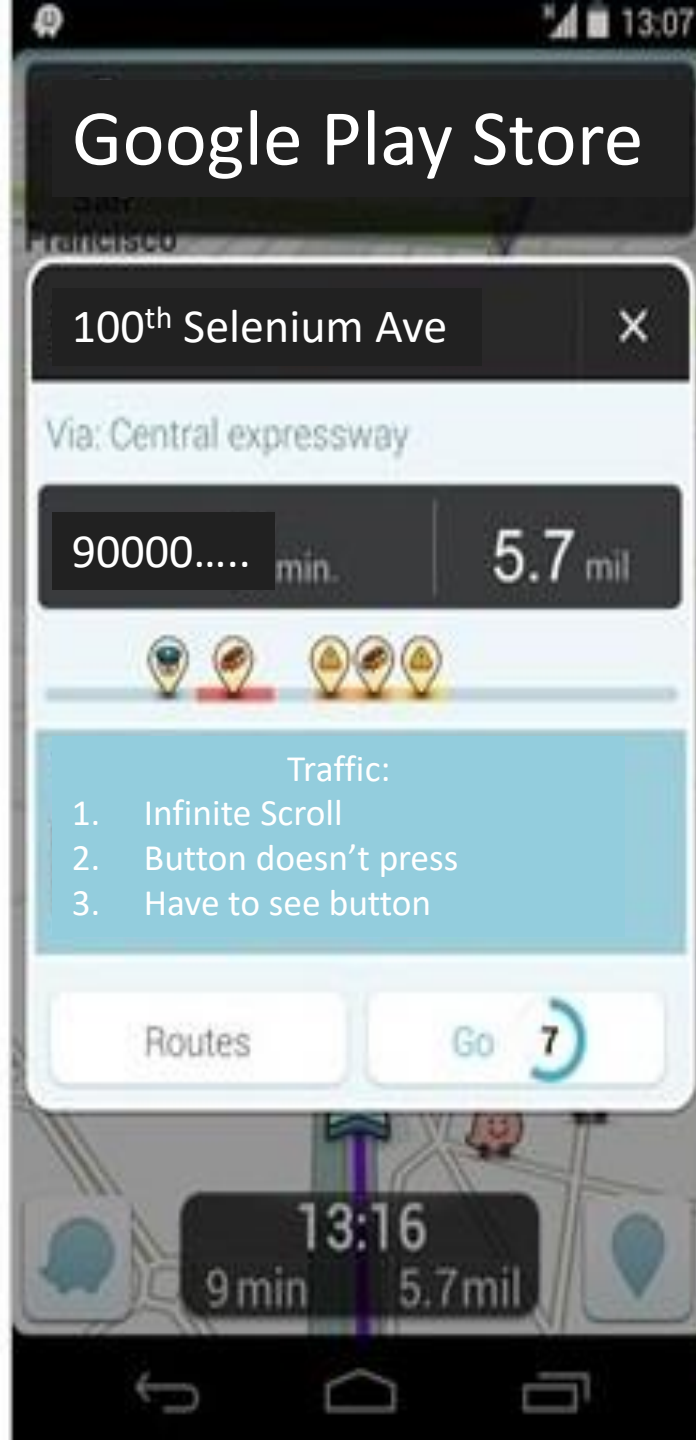

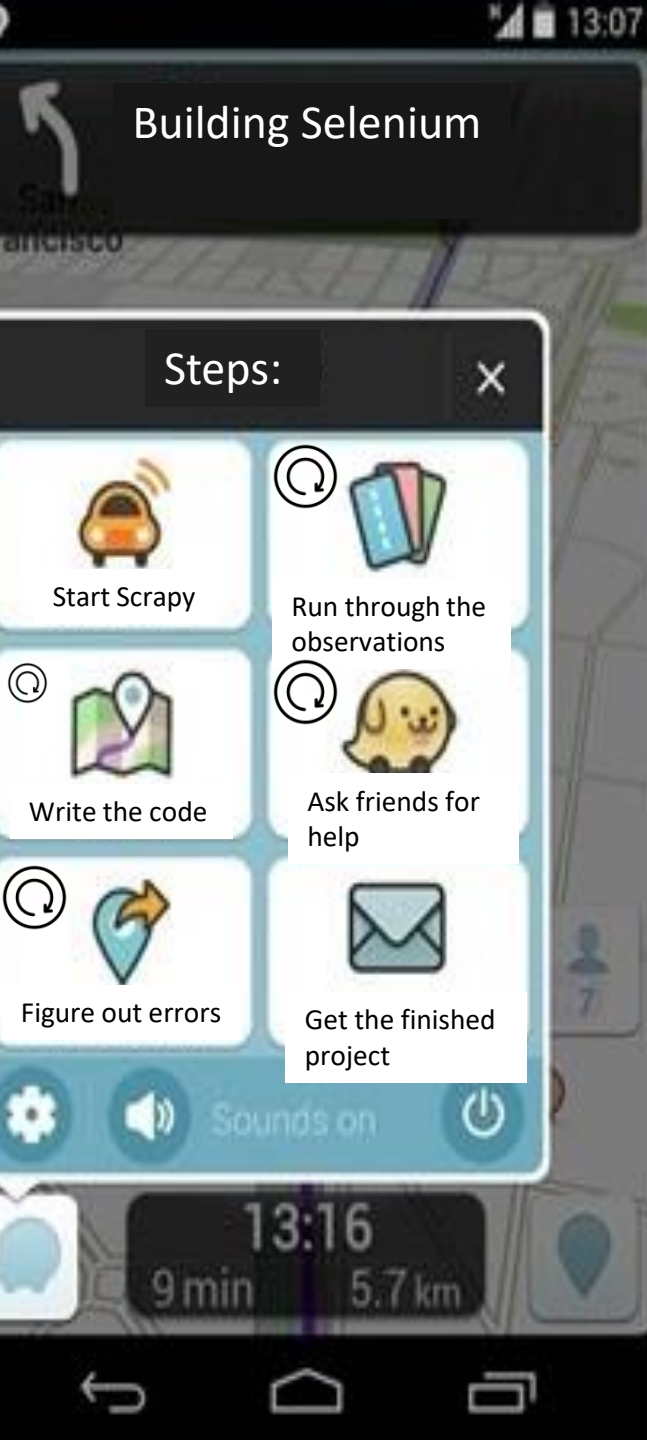

Many people need a navigation app to drive. This is because either there's traffic, they are in a new place, there are one way streets or they are lazy.

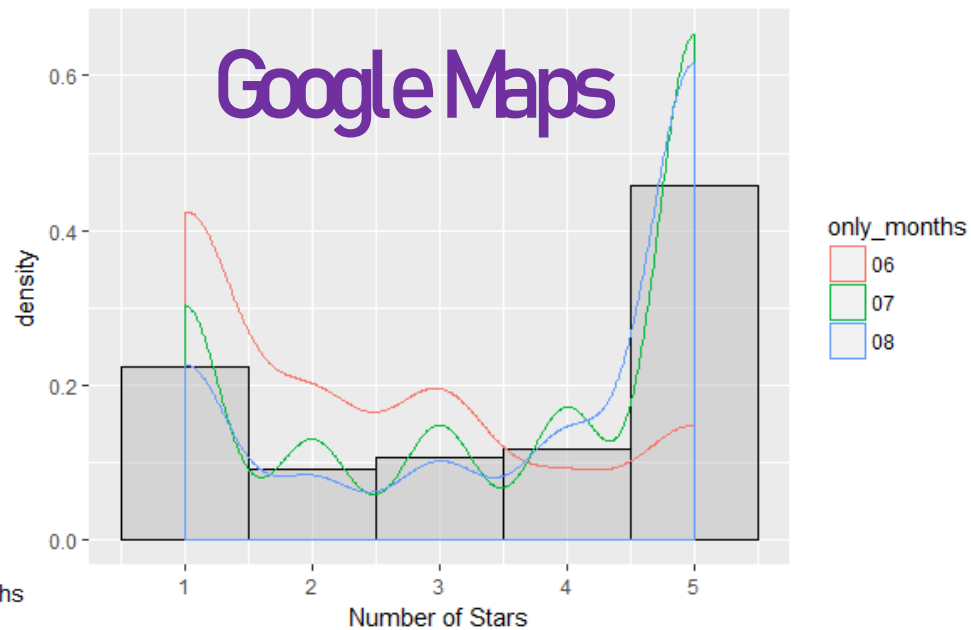

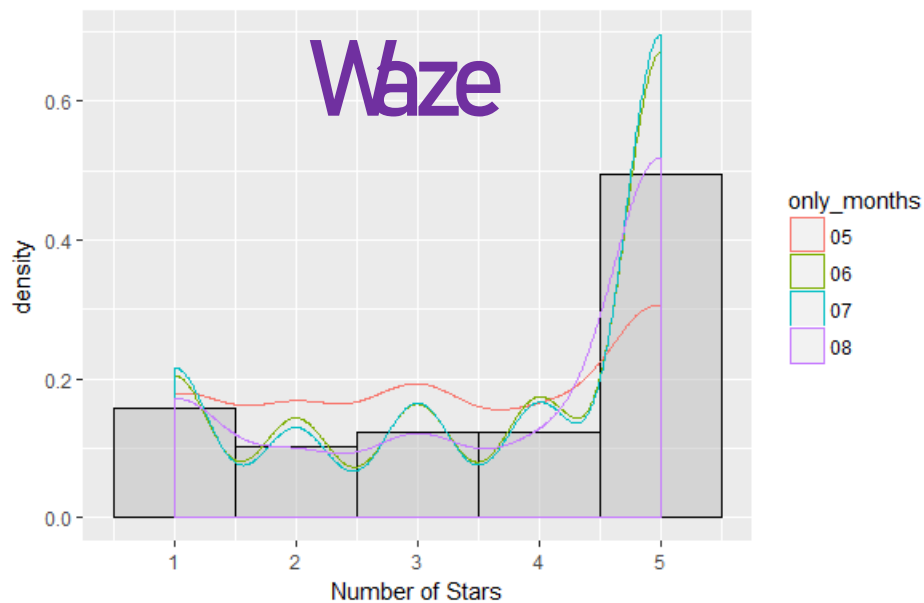

But which app is better to use? Which app seems to answer to their reviews, has better feedback, and has more positive stars?

**Come for the ride and find out!**

Even though they are both owned by google now....

Interesting that  
update is not so  
big here.....

## Google Ratings per day

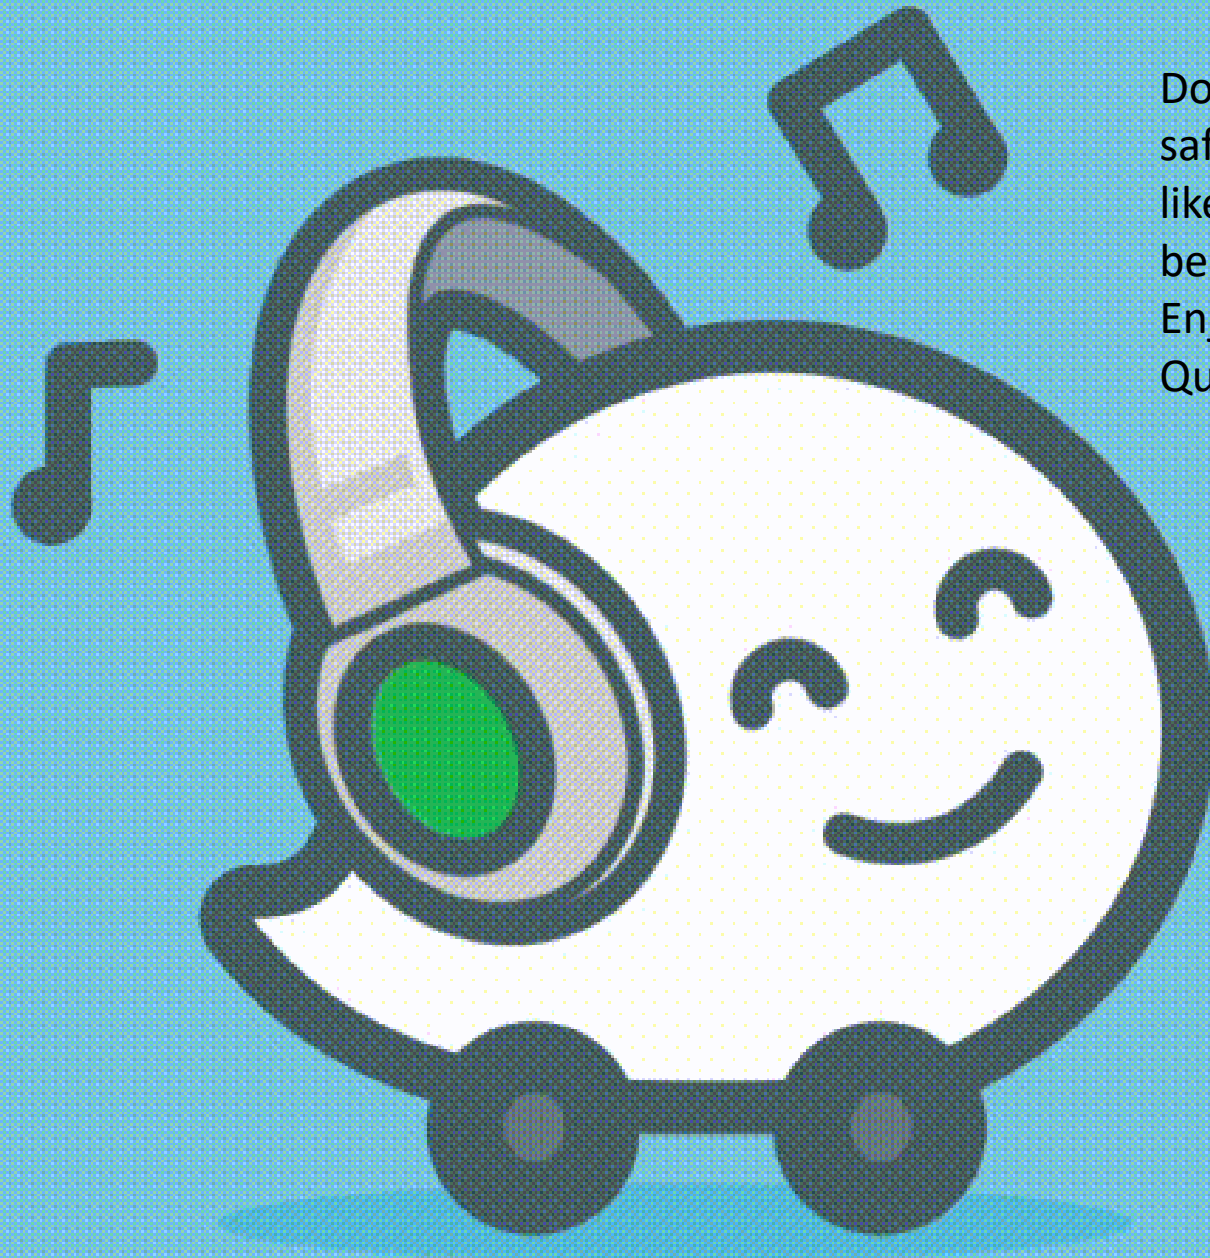

2018

## Waze Ratings Per Day

In the Future I would love to see more data but due to lack of time and the speed of Selenium 5000 reviews are only the dates for about 1 ½ - 2 ½ months.

Do not forget to always drive safely.....use whichever app you like better and write a review because it plays a role!  
Enjoy and have a great day!  
Questions!?!?
